Birth: 05/08/2002

PROFESSIONAL SUMMARY

Senior Electronic Engineering student (FIUBA) nearing graduation. Experienced in industrial environments developing automation solutions, software integration, and digital transformation / applied AI initiatives. Strong background in technical leadership, teamwork, and complex problem-solving.

PROFESSIONAL EXPERIENCE

ALUAR <i>Emerging Technologies / IT Intern</i>	San Fernando, Buenos Aires, Argentina 2025 – Present
– Development of in-house solutions for industrial process automation. – Technical lead on Corporate Intranet development, optimizing internal access to information. – Vendor coordination on applied Machine Learning and Artificial Intelligence projects.	
FERROVÍAS <i>Infrastructure / Signaling Intern</i>	Boulogne Sur Mer, Buenos Aires, Argentina 2024 – 2025
– Digitization and structuring of over 1,300 technical railway signaling schematics. – Optimization of the technical documentation workflow, enhancing operational efficiency. – Updating and editing complex engineering schematics using AutoCAD.	

EDUCATION

B.S. in Electronic Engineering <i>GPA: 7.86 / 10. Status: In progress / Final year</i>	Universidad de Buenos Aires (FIUBA) 2021 – Present
– Capstone Project: Feasibility study of Floating-Gate devices as radiation dosimeters.	
PC Hardware & Repair Technician <i>Technical training program in hardware diagnostics and systems maintenance</i>	UTN INSPT 2021

TECHNICAL SKILLS

Languages: C, Python (NumPy, Pandas, SciPy), SQL.
Software & Tools: AutoCAD, Git, Linux (Ubuntu), Bash.
Electronics: Circuit & PCB design, industrial automation, semiconductor characterization.

LANGUAGES

Spanish: Native **English:** Bilingual / B2–C1

CORE COMPETENCIES

Teamwork, Organization, Problem-solving under pressure, Proactive communication, Commitment.
